

AERIAL & ARTS WORLD FEDERATION

CODE OF POINTS 2026

AERIAL SPORT

Aerial Silks

Aerial Hoop

Aerial Hammock

Approved by the POSA Executive Committee in January 2026

www.posaworld.org

For POSA Aerial competitions at

World Championships
Intercontinental Championships

In competitions for national level, as well as for Amateur Competitions,
modified competition rules may be appropriately designed by international or national technical authorities.

The Code of Points is the property of the POSA.
Translation and copying are prohibited without prior written approval by POSA.
Where there is a difference among the languages, the English text shall be considered correct.

IMPRESSUM

President	Davide Lacagnina	ITA
Vice President	Tamas Katus	HUN

CODE UPDATES

After new version of code is announced, a newsletter which includes:

- all new elements and variations with a number and illustration
- all relevant changes to the rules

The updated code will be sent by the POSA Secretary to all affiliated federations, including the effective date, from which time it is valid for all further POSA competitions.

This code is expanded by the **Rules & Regulations**.

ROADMAP

POSA is engaged in improving the code of points to serve the athletes and organizers in a best possible way. On upcoming updates, POSA aims to:

- Add more lower-level moves for amateur, junior, and master athletes to choose from
- Add descriptions for all difficulty elements in the elements table
- Simplify the declaring process and eliminate the need of declaring combinations
- Apply downgrade option to flexibility moves in the group A

16.4	Group D - Dynamic Elements	270

1 CODE OF POINTS

1.1 GENERAL PURPOSE

The Code of Points provides

- the means of guaranteeing the most objective evaluation of routines in Aerial sport at all levels of regional, national, and international competitions
- standardize the judging of Aerial Sport competitions.
- guide coaches and athletes in the composition of competition routine
- provides information about the source of other technical information and regulations frequently needed at competitions by judges, coaches, and athletes

1.2 TECHNICAL HIERARCHY

The Code of Points is provided by the POSA authorities in Technical Committee. In case of disagreement, the Head of the Technical Committee will decide the correct interpretation of the rules.

In national level the National Technical Committee and the Head of the National Technical Committee are the highest authority over the Local Organizing Committee.

1.3 UPDATES TO THE CODE OF POINTS

Official documents can be downloaded from the POSA website or requested from the local organizer.

1.3.1 Submitting new elements

Classification of new difficulty elements can only be made by POSA Aerial Technical Committee. Applications must be sent to the POSA Secretary by email contact@posaworld.org.

Please note: As Code of point 2025 goes into effect, athletes will have the following opportunities to submit new movements:

- 1- **Athletes participating in (and thus qualified for) Continental Championships (European, Pan American, etc.) and World Championships will be able to submit new elements as specified below**
- 2- **Athletes who are not qualified for the Continental and/or World Championships may submit their new elements in the time frame from June 1 to September 1. 2026.**

It will no longer be possible to submit new elements to the National Championships.

Difficulty elements submitted for evaluation must:

- have written description
- be filmed from two camera angles from the front and the side

Athletes can declare in their **Difficulty sheet**, the new element they want to submit.

They will still have to:

- 1- Send the new element to the international federation.
- 2- Submit, or have his or her coach submit, a written application, at least 24 hours prior to the start of stage rehearsals practice, to the President of the Superior Jury, or to the Head Judge, for a determination of the difficulty value of a new element.
- 3- Insert the new element in the difficulty sheet with the indicating value.

The athlete has the right to:

- Receive in writing, at a reasonable time prior to the beginning of the competition, the value assigned to a new jump or element submitted for evaluation.

In any case, the value of the new element will be validated directly by the international federation, considering the value assigned to it during the competition.

Accepted elements will be added to the next version of code of points and the videos will be uploaded to POSA Video Archive.

This type of possibility is a very common practice in gymnastics or figure skating, but completely new in Aerial, as it makes the task of the Head Judge and the Judges of the difficulties, much more difficult, because they must be able to evaluate the element on sight and give it a value.

Let us analyse the practice that the athletes must follow to present the new element.

First, it must be underlined that the old practice is still valid, that is, each athlete will have the possibility to send the element directly to the international federation.

The new practice is just a kind of shortcut that allows the athletes to see the element immediately recognized, without having to wait for the release of the annual Appendix or directly for the new edition of the COP.

What should the athletes do?

They will have to:

- 1- Send within ten days from the competition, the new movement to the international federation with the request to present the new element at the next competition (national or international), at this point POSA will forward the video to the Head Judge and the Judges of Difficulty of that competition.
- 2- Submit, or have your coach submit, a written request on plain paper, at least 24 hours prior to the start of the floor tests, to the Head Judge, or Head Judge, for the determination of the difficulty value of a new element, if necessary, show the new movement to the jury.
- 3- Enter the new element on the difficulty sheet with the indicated value.

The athlete has the right to:

- To receive in writing, in a reasonable time before the start of the competition, the value assigned to the new element submitted for evaluation.

At that point, the athlete can definitively and officially enter the new movement, in the Difficulty Sheet, and thus have the new element, in the total Difficulty count.

Duties of the Head Judge and the Difficulty Judges

In this new juncture, the role of the Head Judge, assisted by the two Difficulty Judges, is fundamental, because it is they who must analyze the new movement from many points of view, to assign a correct score.

- 1- *Place the element in one of the four groups (remember that Group E has no elements of its own).*
Surely, this is the easiest task, since the athlete, usually, has already independently assigned a placement of the movement in one of the groups provided by the code.
Sometimes, however, some athletes tend to get confused, especially between elements that could be in either group B or group C or D.
- 2- *Analyze the movement from a biomechanical point of view to determine its difficulty.*
In this case, the judges will have to understand how difficult this element is and above all, if it is a variation of an already codified movement.
If it is a variation, they will have to determine if this innovation increases or decreases the difficulty of the original movement.
Knowing, therefore, the value of the original movement is fundamental to determining the value of the new element.
If, on the other hand, the movement is completely new, they will only need to analyze it from a biomechanical standpoint.
- 3- *Recognize the "matrix" of the new element, i.e., if it is part of a "family" of elements (of one of the COP groups) to determine its value.*
It is essential to be able to recognize the "family" in which this element was born, i.e., if there are similar elements in the COP (or with the same biomechanical principle) as the new one.
For example: when the Guseva Plank was presented in Pole Sport, we immediately checked the value

of the movement most like it, i.e., the Tabletop.

Only after having ascertained the value of the latter, it was possible to assign the value of the Guseva Plank, which thus became part of the Tabletop family. in Pole Sport elements

Therefore, knowing how to identify the "matrix" of the new element, will help you a lot in assigning the value of the same.

Special cases, i.e., value assignment with momentary reserve

It could happen that the athlete presents a movement with a very high technical content, which perhaps could get a higher score than allowed for the category of the athlete.

Example A:

- A Junior A athlete presents a move to which the Head Judge and the two Difficulty Judges cannot help but assign the maximum allowed by our Code, i.e., 1.0.
- However, this athlete, according to the rules, already has an element declared in his Difficulty Sheet, of the same value and therefore, as provided by the COP, he/she cannot declare more than one element.

What happens in this case?

What happens is that for that competition the new element will have the maximum value allowed by the Code for the athlete's category, or in this specific case, 0.7, but in the COP, it will be entered later with the exact value assigned by the jury during the evaluation.

Obviously, this example is configured to all those categories that have specific restrictions in the declaration of the elements, namely:

- Junior Varsity
- Junior A
- Junior B
- Master +40

and obviously all the Amateur categories (yes: even an amateur athlete can submit new elements).

Example B:

- Athlete submits a movement that cannot be entered into the COP (therefore cannot be recognized) due to lack of opportunity to assign minimum requirements

What this means?

It means that the athlete has submitted a movement that cannot be assigned a suitable requirement for the group in which it should be placed.

For example, if it is not possible to determine a correct opening of the legs (160° or 180°), or if it is not possible to determine a requirement of parallelism to the floor or to the silk \ hoop, in short, if the element does not have a real placement in any group of the code for lack of identifiable requirements.

It often happens, that athletes "exchange" a beautiful movement that can only have a purely artistic value, with a movement to be coded.

What happens in a case like this?

In this case, the situation is a bit more delicate, as the athlete, presumably, has already included in his/her routine, the movement in question, sure of the recognition and therefore sure of being able to obtain a good evaluation of the element for the total score of the difficulties.

The jury must then act in the following ways:

- A- Communicate to the athlete that the movement cannot be inserted, asking him/her if he/she has a reserve element to insert in its place without upsetting the choreography.
- B- If the answer is positive, i.e., if the athlete can insert another movement of the Code, there will be no need for a recognition (even momentary) of the movement; but if on the contrary the athlete does not have an alternative, the Jury will have to assign to the element the minimum value provided for the declaration of the elements for the athlete's category.

For example, if the athlete is a Senior Competitive, a value of 0.3 will be assigned to the element, which is the minimum allowed for that category.

Attention: the assignment of that value will only be temporary and limited to that competition, after that competition, it will have no value and will not be included in the COP.

Example C:

- The athlete performs the new movement during the competition, but contrary to the submitted video and contrary to what he did during the stage rehearsals, he/she misses the element, so the value that was previously assigned, cannot be assigned during the routine.

What happens in a case like this?

In this case, the judges will recognize that the element has been tested; therefore, it will be part of one of the groups of our COP and it will be inserted in the Code, but obviously they will not be able to give the element as correctly performed in that competition (so in the Difficulty Sheet it will be zero), but obviously they will communicate to the international federation that the new movement has been shown before the competition, but that the result during the competition has not been positive.

In this case, the hypothetical value assigned to the element will be communicated to POSA with reservation.

After the competition: duties of the Head Judge and the Difficulty Judges

After the competition, the Head Judge will have to send to the international federation, a compiled document (which in turn he/she received from POSA), in which there must be written

- A- A technical description of the element(s) and the name(s) of the athlete(s) who submitted it.
- B- The minimum requirements (which could be increased or decreased by the Technical Committee)
- C- The value assigned to the new movement
- D- Specify if the value has been assigned with reservation and the reason for that reservation
- E- The outcome of the movement in the competition (if it was completed correctly)
- F- The place and date of the competition in which it was submitted

After the competition: duties of the Head Judge and the Difficulty Judges

After the competition, the Head Judge will have to send to the international federation, a compiled document (which in turn he/she received from POSA), in which there must be written

- A- A technical description of the element(s) and the name(s) of the athlete(s) who submitted it.
- B- The minimum requirements (which could be increased or decreased by the Technical Committee)
- C- The value assigned to the new movement
- D- Specify if the value has been assigned with reservation and the reason for that reservation
- E- The outcome of the movement in the competition (if it was completed correctly)
- F- The place and date of the competition in which it was submitted

2 AERIAL SPORT

Aerial sports routine performed on a music with choreographic and artistic components, demanding physical strength, flexibility, dexterity, and coordination on the aerial silks / aerial hoop / aerial hammock.

● AERIAL SILKS

Routines on aerial silk mean the ability to perform a complex of technically high-level movements on aerial silks (dynamic and balance elements, movements showing strength and flexibility). Routines are performed to a piece of music with choreographic and artistic components.

● AERIAL HOOP

Routines on aerial hoop mean the ability to perform a complex of technically high-level movements on hoop with spanset (dynamic and balance elements, movements showing strength and flexibility). Routines are performed to a piece of music with choreographic and artistic components.

● AERIAL HAMMOCK

Routines on aerial hammock mean the ability to perform a complex of technically high-level movements on aerial hammock (dynamic and balance elements, movements showing strength and flexibility). Routines are performed to a piece of music with choreographic and artistic components.

2.1 COMPOSITION OF A COMPETITION ROUTINE

2.1.1 Length of routine

In all amateur and paraathlete divisions routine is 3:20 to 3:30 minutes. In competitive division the length is 3:20 to 3:30 for junior athletes and 3:50 to 4:00 for seniors and masters. Music length violating the requirements will be deducted by Head Judge.

First tone of the music identifies start of the routine; last tone of the music identifies end of the routine.

Category	Amateur	Competitive	Parasilk \ hoop athletes
Varsity, Junior A, Junior B	3:20 – 3:30	3:20 – 3:30*	3:20 – 3:30
Seniors, Masters	3:20 – 3:30	3:50 – 4:00	3:20 – 3:30

*An exception for competitive category in aerial silks:

Music length for junior A, junior B, juniors mix competitive is 03:20-03:45

2.1.2 Choice of music

Music can be selected from any style and can contain lyrics. One or more pieces may be mixed. Original music and sound effects are allowed. The recording must meet professional standards regarding sound reproduction.

It is not allowed to use lyrics containing sexual, violent, politic or any other offensive content. Music violating the requirements will cause the athlete to receive a deduction by the Head Judge.

Music should be sent to the appropriate email as defined by the deadline date in the official work plan. Files must be sent in MP3 format. The title, artist and composer should also be sent with your music file to the competition organizer.

2.2 LEVEL OF REGIONALITY

POSA recognizes different levels of regionality:

- World Championships
- Intercontinental Championships
- Continental Championships
- National Championships
- Regional Competitions (such as qualifiers for National championship)
- Local Competitions

In competitions for national level, as well as for amateur competitions, modified competition rules may be appropriately designed by national technical authorities and these modified rules will take precedence over Code of Points.

NOTICE: The Pole Sport World Championship is reserved exclusively to the Competitive categories. Except for different communications from the International Federation.

2.3 COMPETITION SEASON

POSA competition season starts at 1st of January and ends with Pole Sport World Championships in late November or December. Any kind of changes will be communicated by POSA. Any variation for the Aerial Sport World Championship will be communicated directly by the POSA

2.4 CATEGORIES

In all POSA competitions, athletes are divided in categories based on their age and gender. Age is determined based on the year of birth.

Athlete enrolled in the wrong category will be disqualified by Head Judge.

In doubles, both athletes must be from same category, and they may be same-sex, or mixed gender. Only in Doubles Juniors Mix athletes must be from different categories: one of them Junior A (10-14) and the other one Junior B (15-17). Athlete can participate as individual and as double in same competition.

Categories by ages opened for the competitive year 2023:

Category	Year of birth	Age
Varsity (mixed)	2017-2020	6-9 years
Junior A (men / women / doubles)	2012-2016	10-14 years
Junior B (men / women / doubles)	2009-2011	15-17 years
Junior Mix (doubles)	2009-2016	10-17 years
Senior (women/ doubles)	2008 or before	over 18 years
Senior men*	2010 onwards	over 16 years
Masters 40+ (men / women)	1986 or before	over 40 years
Masters 50+ (men / women)	1976 or before	over 50 years
Senior Doubles Mix**	2009-2011 & 2008 or before	15-17 & over 18 years

Note: Athletes over 40 years can participate in the Senior Category provided that their technical level is enough.

**This category is experimental and gives the male athlete, who has already reached the age of 16, the opportunity to compete in the Senior Men category. A male athlete who has already turned 16 and wants to compete in his category (i.e. Junior B Men) may do so. In fact, entry in the Senior Men category is not compulsory until the age of 18. This category is Competitive only, in Amateur division males 16 years old athletes, must compete in Junior B Men Amateurs.*

***This category consists of one Junior B athlete (between 15 and 17 years of age) and one senior athlete (18 years and over)*

Note: An individual mixed Varsity Category may only be arranged in national level competitions, except for different provisions issued directly by the International Federation.

2.4.1 Safety in the Junior categories

2.4.1.1 LEGAL GUARDIAN

All athletes under 18 must have a parent/legal guardian present at the competitions. If the parent/legal guardian is unable to attend, he/she need to provide notarized document of temporary guardianship in free form in English to the responsible person (friend, family member, coach, or other member of the national delegation).

2.4.1.2 USE OF SPOTTER

- a) Spotters are required on the stage for every performance in Varsity category. In Junior categories (A and B) spotters are mandatory.
- b) Spotters have to stand at the back of the stage during the performance and move closer to the athlete in high risk moves.
- c) No contact or verbal instructions are allowed during the performance unless in the event of an accident. All contact is deducted by the Head judge.
- d) In case of an accident where spotter is required to intervene, the Head Judge may either stop and disqualify the performance or give a deduction of 5 points.
- e) In case of disqualification a clear mark is given to the athlete and the music will be stopped. Spotter may also stop the performance if they see it necessary.
- f) Senior athletes also can have the spotter in case of difficult and risky elements

The presence of protective mats 2 x 2 with a height of at least 20 cm is a prerequisite for all athletes.

Deliberate use of pendulum movements in the ring and canvases (deliberate swinging) is prohibited, as the athlete may fall outside the mats. In case of non-compliance with this rule, the athlete receives a penalty of -5 points from the head judge.

Athletes of the age group 6-9 years are prohibited from performing exercises at a height of more than 6 meters, regardless of the skill level. In case of non-compliance with this rule, the athlete receives a penalty of -5 points from the head judge.

2.5 DIVISIONS

Division defines the level of difficulty of the performance. Divisions may be divided based on experience, ranking, previous competition results or other suitable methods.

Divisions may not be restricted by athletes age, occupation or previous sports background or any other non-Aerial sport related achievement. Invitationals are allowed, but they are to be held purely on showcase manner and the results are not accepted in official ranking or as results.

2.5.1 Official divisions

- Amateurs
- Competitive
- Paraaerial

A competition can contain one or multiple divisions.

In national level competitions custom divisions (such as semi-professional) are allowed but any new divisions and their rules should be informed to POSA for inspection.

2.5.1.1 PARAAERIAL ATHLETES

Athletes with physical or visual impairments can compete in paraerial division.

In parasilk / hoop division no difficulty elements are declared, but the first five elements in order of execution from the highest value that the athlete presents in the routine will be judged on sight.

The athlete is not required to present one element per group, the elements performed may also be from the same group.

Athletes must prove their disability by medical certificate or invalidity card.

Minimum impairment criteria & Paraaerial categories:

- **Vision impairment**
Vision is impacted by either an impairment of the eye structure, optical nerves or optical pathways, or visual cortex of the central brain.
- **Impaired muscle power**
Impairments in this category have in common that there is reduced force generated by the contraction of a muscle or muscle groups, such as muscles of one limb, one side of the body or the lower half of the body. Examples of conditions included in this category are paraplegia and quadriplegia, muscular dystrophy, post poliomyelitis and spina bifida.
- **Impaired passive range of movement**
The range of movement in one or more joint is reduced in systematically way, for example due to arthrogryposis. However, hypermobility of joints, joint instability, and acute conditions causing reduced range of movement, such as arthritis, are not considered eligible impairments.
- **Limb deficiency**
There is a total or partial absence of bones or joints as a consequence of trauma (e.g. traumatic amputation), illness (e.g. bone cancer) or congenital limb deficiency (e.g. dysmelia)
- **Leg length difference**
Due to congenital deficiency or trauma, bone shortening occurs in one leg.
- **Short stature**
The standing height is reduced due to aberrant dimensions of bones of upper and lower limbs or trunk, for example due to Achondroplasia or growth hormone dysfunction.
- **Hypertonia**
Hypertonia is a condition marked by an abnormal increase in muscle tension and a reduced ability of a muscle to stretch. Hypertonia may result from injury, illness, or conditions that involve damage to the central nervous system. When the condition occurs in children under the age of two (2), the term cerebral palsy is often used, but it also can be due to brain injury (e.g. stroke, trauma) or multiple sclerosis.
- **Ataxia**
Ataxia is a neurological sign and symptom that consists of a lack of co-ordination of muscle movements. When the condition occurs in children under the age of two (2), the term cerebral palsy is often used, but it also can be due to brain injury (e.g. stroke, trauma) or multiple sclerosis.
- **Athetosis**
can vary from mild to severe motor dysfunction. It is generally characterised by unbalanced, involuntary movements and a difficulty in maintaining a symmetrical posture. When the condition occurs in children under the age of two (2), the term cerebral palsy is often used, but it also can be due to brain injury (e.g., stroke, trauma).
- **Partial or full deafness**
Deafness is defined as the total loss of hearing ability. Hearing impairment, on the other hand, is when the loss is partial, ranging from slight to moderate, severe to profound. If the disorder only affects one ear, it is defined as unilateral.

3 COMPETITION REGULATIONS

Any official POSA competition must follow requirements set on the Code of Points and the Rules & Regulations. In competitions for national level, as well as for Amateur Competitions, modified competition rules may be appropriately designed by international or national technical authorities.

3.1 WORK PLAN

All details about the competition schedule, used equipment, qualification procedures and other aspects that affect the athletes must be included in the Competition Work Plan. Work Plan should not be published later than four months before the competition.

3.1.1 Local Organizing Committee (LOC)

Local organizing committee consists of the people responsible for hosting the competition. The organizing committee is responsible for all communications to the athletes and must keep Work Plan up to date.

Note: A person, who is part of the organizing committee cannot participate in the competition as athlete, judge, or coach. There cannot be a conflict of interest when competing or judging.

3.2 COMPETITION SCHEDULE

The competitions must not start earlier than 8.30 AM or finish later than 11.00 PM (23.00) and the schedule must be published in the Work Plan.

3.2.1 Starting order

- a) Starting order is decided by draw.
- b) The Drawing by lot will take place within two weeks after the deadline of the definitive entry.
- c) The lots shall be drawn by a "neutral" person or by computer.
- d) Head of technical committee or nominated committee member must be present during the draw.

Note: At international competitions, the national federations will be informed by the General Secretary at least one month beforehand of the time and place of the drawing of lots and they will be entitled to be present at the draw.

The media will be informed and allowed to send representatives and the local authority, in whose area the draw will be held, will be invited to send representatives.

3.2.2 Fail to appear on stage on time

Should a competitor **fail to appear on stage within 20 seconds** after being called, a deduction of 1.0 point shall be made by the Head Judge.

Should a competitor **fail to appear on stage within 60 seconds** after being called, the start will be deemed as a Walk Over. Upon announcement of such a Walk Over the competitor loses his/her right to participate in the category in question (he/she will be disqualified).

In case of EXTRAORDINARY CIRCUMSTANCES, refer to next chapter.

3.2.3 Extraordinary circumstances

Extraordinary circumstances include, but are not limited to, the following situations:

- a) Incorrect music is cued.
- b) Music problems due to the malfunction of the equipment.
- c) Disturbances caused by general equipment failure - lighting, stage, venue.
- d) The introduction of any foreign object into the performance area by an individual or means other than by the competitor.
- e) Extraordinary circumstances causing a walk-over out of the competitor's control.

It is the responsibility of the competitor to stop the routine immediately if an extraordinary circumstance as mentioned above arises. A protest after the completion of a routine will not be accepted.

Upon the decision of the Head Judge, the competitor may restart the routine after the problem has been corrected. Any scores previously given will be disregarded. Where situations not stated above may arise, they will be resolved by a review of the circumstances by the Superior Jury. The decision of the Superior Jury is final.

3.2.4 Recovery period between routines

For the health and safety of athletes, POSA has accepted that athletes competing in multiple finals require minimum 10 minutes to recover before competing again. This recovery period has been translated to equal to minimum 2 competition performances.

The draw will be adjusted according to this principle. If an athlete or doubles compete 7th in one rotation and are drawn in positions 1-3 in the next rotation the new starting position will become 4th. If an athlete or doubles compete last in a rotation and are drawn in positions 1-4 in the next rotation the new starting position will be 5th.

This adjustment, if necessary, will be made by the Superior Jury President and once the qualifying athletes are determined an adjusted draw and start list will be produced by Timer Judge. This principle applies for all following rotations and final competitions.

3.2.5 Results

1. After each routine, total scores (A, E and D scores), penalties, final score and the rank must be displayed to the public. After competition, athletes are also given the evaluated difficulty sheets with judge's notes.
2. After the Qualification round, each participating member federation must receive a complete copy of the results, they will be published on the website of the international federation.
3. At the end of the competition, athletes may request feedback from the Head Judges, and they may view the Difficulty Sheets. **At the discretion of the Head Judge, they may view the Art and Execution sheets, but may not photograph the sheets. Any intemperance to this rule will be punished by the POSA Ethics Committee, configuring it as "Disrespectful behaviour towards the Jury and the Head Judge".**
4. Feedback should be requested immediately after the competition, directly in the Sport Hall, however, the athlete may also request feedback via email to the head judge no later than one week after the end of the competition. After this period, no more feedback can be requested.

3.2.6 Cancellation

- a) Athletes may only cancel participation a maximum of **15** working days prior to the competition. Exceptions include medical reasons and emergencies in which medical documentation or something similar and proof of travel ticket must be provided to the organizing committee and POSA for confirmation a minimum of one day prior to the competition.
- b) Athletes not showing on the day of registration due to an emergency will have a maximum of seven days after the competition has ended to provide necessary proof of documentation.
- c) In the case of an athlete not presenting themselves to registration without a legitimate reason, the athlete will be banned from all POSA recognized competitions for a period of one year. Names of banned athletes will be published on <http://www.posaworld.org>.

3.2.7 Final rehearsal

All athletes must have the opportunity to have a final rehearsal at the competition venue with the full sizes competition floor and sports equipments. Access to the floor is given by a rotation schedule set up by the organizing committee and approved by the POSA Technical Committee.

3.3 FACILITIES

3.3.1 Dressing rooms

Men and women must have separated dressing rooms with toilet facilities which are separate from those being used by judges and spectators.

Barrier-free rooms and toilet facilities should be provided for Parasilk \ hoop.

3.3.2 Warm Up area

A designated warm up area should be connected to the dressing rooms and It is only to be used by the athletes and their coaches.

3.3.3 Waiting area

A designated area connected to the podium is referred to as the Waiting Area. It is only to be used by the athletes and their coaches of the next two starts. The area is not allowed to be used by any other person.

3.3.4 Stage and floor

The podium (stage) should be at least 8 m x 8 m in size and no more than 10 m x 10 m. The competition floor must be in wood or linoleum.

- a) If the competition is in a sports arena, the podium on which the competition takes place, can be 80 to 100 cm high and closed off at the rear with a background.
- b) If the competition is in an auditorium, theatre, or other suitable structure for the smooth running of the competition, the stage must have the same minimum measurements required for an organized competition in a sports arena.

The lights must be fixed, clear, white, and/or blue, to allow the best view of the Judges. Strobe lights are not permitted in any POSA competition.

The competition area must have a soft area with mats in the center under the sling. The size of mats - 2 * 2 meters and at least 20 cm thick. The distance from the mats to the edge of the competition area on all sides should be at least 3 meters.

3.3.5 Competition silks \ hoop

The recommended sling height is 8 meters. The sling consists of a winch (automatic or mechanical) with the possibility of periodic change of the equipment. Metal \ rope rope. It is forbidden for competitors to use their carabines, swivels.

- The minimum height of the sling for national and international competitions is 6 meters.
- The minimum height of the sling for regional competitions is 4 meters.

A mobile suspension structure – a pyramid - is allowed.

Equipment can be provided by the organizers, and participants also have the right to perform on their personal silks \ hoop if they meet certain requirements listed below.

- Aerial silks: consist of a durable fabric of medium extensibility with a width of 1.5 to 2.8 meters and a length of 6 to 10 meters, the longitudinal edges of the fabric should not be cut and should only have factory edge processing.
- Aerial hoop: consists of stainless steel, the diameter of the hoop is from 75 to 110 cm, the diameter of the tube of the hoop is from 23 to 30 mm. Hoop winding is mandatory. The sling of the hoop is carried out exclusively for one attachment point. The presence of a spanset is mandatory. The length of the spanset is optional. The presence of additional devices on the hoop (for example, a pole, a loop) is prohibited.

Aerial Hammock: consists of a durable fabric of medium extensibility with a width of 1.5 to 2.8 meters and a length up to 8m (height of hammock 4m). Rigging is carried out exclusively for one attachment point.

3.3.6 The preparing of equipment and means of coupling

The suspension of equipment is carried out by a specialist who has the appropriate license. Before the performance, the coach and the athlete go to the stage to prepare the equipment at the required height. After the equipment is prepared, the athlete and the coach must leave the competition stage until the presenter calls the athlete to perform.

Any means of coupling are prohibited.

4 REGULATION FOR THE ATHLETES

4.1 GENERAL

The athlete has the right to:

- a) Have their performance judged correctly, fairly, and in accordance with the stipulations of the Code of Points.
- b) Have their score publicly displayed immediately following their performance or in accordance with the specific regulations governing that competition.
- c) Repeat their entire routine (without deduction) with the approval of the Head Judge if the exercise has been interrupted for reasons beyond their control or responsibility.

Note: An athlete may repeat the entire exercise at the end of the rotation, or if she is the last athlete in the rotation, at a time at the discretion of the Head Judge.

- d) Receive through their delegation leader the correct result output, showing all their scores received in the competition.
- e) Receive relevant information about aerial hoop & silks and stage used in the competition at least two months before the competition.
- f) Try out the competition silk \ hoop and stage at the venue prior to the competition.

4.2 RESPONSIBILITIES OF THE ATHLETE

- a) To know the Code of Points and conduct themselves accordingly.
- b) Athletes under the age of 18 must have an approved guardian (parent/authorized legal representative/coach) with signatory authority.
- c) Provide information about their legal gender and age. A copy of their birth certificate must be submitted upon request.
- d) To carry health insurance and identification documents to the competition.
- e) To be fully responsible for their personal health condition and ability to compete. To avoid injury, all athletes must not undertake elements they are not fully confident and secure in.
- f) To be fit, healthy and not knowingly pregnant. Upon request the athlete may be required to produce documentation from a doctor as confirmation of good health and fitness level. All information will be held confidentially.
- g) Sign the POSA antidoping program with WHEA at least three months before the competition (It is advisable to sign it every year in January, to be "covered" by the program for the whole year).
- h) To wear the official national tracksuit during the competition.
- i) Appear to the stage in time when announced.

4.3 ANTI-DOPING

POSA antidoping rules follow the World Heavy Events Association (WHEA) antidoping program.

The athlete must sign antidoping contract with WHEA within a minimum of 3 months prior to the first international competition. From 2019 onward, this rule will also be enforced for all national and regional competitions.

With the contract athlete commits to the antidoping program and the rules it includes (for example WADA CODE and National anti-doping regulations). The contract puts the athlete under doping monitoring, and he/she can be tested in competitions and training season without pre-notice by WADA officials in each country. All federations, athletes, coaches, and organizers can consult the POSA Anti Doping Rules.

More information on WADA and WHEA can be found on <https://www.posaworld.org/anti-doping/> and <https://www.wada-ama.org> .

4.4 NATIONALITY

Athletes may only represent a country they have citizenship and/or permanent residency (minimum of 90 days of residency). In the case of dual citizenship, athlete may represent either one of them, as he/she may

elect. However, after having represented one country in the international, intercontinental, or national championships recognised by POSA, he/she may not represent another country.

Athletes wishing to change their country of representation must allow for one competitive year before the changeover. Changes of nationality are dealt with by the POSA Executive Committee.

4.5 DRESS CODE

A neat and proper athletic appearance is always mandatory. Attire violating the dress code will be deducted by Head Judge.

4.5.1 National tracksuit

National delegations must ensure that all their athletes have **matching official national tracksuit** according to the following requirements:

- a) Tracksuits must include trousers (leggings are allowed on stage), t-shirt or tank top and a jacket in colour and design of choice.
- b) Tracksuits must have the name and/or logo flag of nation represented by the delegation. The name of the country must be written on the tracksuit and t-shirt/tank top.
- c) One individual sponsor's logo may be worn on the jacket and up to ten (10) sponsor logos may be worn on the t-shirt/tank top. The size of the logos cannot be more than 10x10cm.
- d) National federation logos can be worn. The size of the logo cannot be more than 10x10cm.

For more information, please refer to the Official POSA Rules & Regulations.

During internationals POSA Aerial competitions the athlete must wear their official national tracksuit at the Opening and Closing ceremony and competition attire for Medal award ceremonies.

4.5.1.1 ATHLETES WITHOUT NATIONAL DELEGATION

If athlete is not part any official national delegation the athlete can wear black trousers, white t-shirt or tank top and black jacket.

4.5.2 Competition attire

4.5.2.1 WOMEN'S ATTIRE

- 1- Women (Seniors) and girls (Juniors) must wear unitary costume. Sparkles are allowed. Net fabric is allowed only at the top part of the sternum or on sleeves
- 2-The neck line of the front must be no further than half of the sternum
- 3-The cut at the top of the legs must not go higher than the waist and the outside seam must pass through the crest of ilium
- 4-The costume can't be made of leather or any other fabric which can improve or worsen coupling with hoop or silk
- 5-The costume can't be modified during the routine
- 6-Short parts of a costume can be done (for example skirt, ruche) if they are not longer than 30 cm
- 7-The costume must fit athlete's body to give judges an opportunity to correctly evaluate the right position of different parts of body

4.5.2.2 MEN'S ATTIRE

- 1-Men may wear leotard, jumpsuit or trousers
- 2-Sparkles are allowed
- 3-3/4 leggings are allowed
- 4-The costume can't be made of leather or any other fabric which can improve or worsen coupling with hoop

or silk

5-The costume can't be modified during the routine

6-The costume must fit athlete's body to give judges an opportunity to correctly evaluate the right position of different parts of body

4.5.2.3 NATIONAL EMBLEM AND ADVERTISING

During competitions, the athlete must wear a national emblem on the costume.

- a) Emblem must be between 2 cm x 4 cm and 4 cm x 8 cm in diameter.
- b) Emblem must **only** be sewn on
 - front side of the costume,
 - at the hip or on the top of the costume (chest or shoulder). **Any place other than the eligible spaces of the costume will be penalized by the Head Judge with 3 points (Incorrect attire).**
- c) Emblem must be clearly visible and easily separated from the fabric and embellishments.
- d) No logos advertising or sponsorships identifiers are permitted in the competition attire.
- e) Advertising logos or sponsorships identifiers are allowed on the national tracksuit only.

4.5.2.4 HAIR, MAKE-UP, AND OTHER RESTRICTIONS

- f) Hair must be secured close to the head, pigtail or ponytail is allowed, but its length must not exceed the shoulders. Face must be clearly visible without any disturbing element.
- g) The competitors cannot wear any kind of shoes; only bare feet are permitted.
- h) Make-up can be for both men and women but used sparingly, the face must be visible, the makeup cannot completely cover the face, but it must be limited to the area of the eyes and the upper part of the cheeks.
- i) Loose and additional items to the attire are not allowed. Strass, sequins, and other types of sewn or glued embellishments may be attached to the attire.
- j) Jewellery or piercings must not be worn.
- k) Torn or ripped costume and/or undergarments must not be shown during a performance.
- l) National emblem must be worn in all international competitions.
- m) Leather, latex, PVC, or rubber are not suitable materials for the attire. Attire must be in non-transparent material in intimate parts (chest, groin, and buttocks).
- n) Swimwear or bikinis are not allowed.
- o) Attire depicting war, violence or religious themes is forbidden.
- p) Body painting is not allowed.

4.6 **ATHLETES OATH**

"In the name of all competitors, I promise we shall take part in these World Championships (or any other official POSA event), respecting and abiding by the rules which govern them, committing ourselves to a sport without doping and without drugs, in the spirit of true athleticism, for the glory of sport and the honour of our teams."

5 REGULATIONS FOR COACHES

In the case that an athlete has no coach or other representative such as parent or guardian, the duties and responsibilities of the coach fall to the athlete herself/himself.

The coach has the right to:

- a) Assist athlete during the competition and access to dressing rooms, warm up and waiting area.
- b) Act as spotter for junior athletes during their performance.
- c) Receive athletes scores after the performance.

5.1 RESPONSIBILITIES FOR THE COACHES

- a) To know the Code of Points and the Rules & Regulations and conduct themselves accordingly.
- b) To wear the official national tracksuit during the competition.

Note: A person who has operating ban from WADA or WHEA may not act as a coach.

6 REGULATIONS FOR NATIONAL DELEGATIONS

In the case an athlete is not part of the national delegation the duties and responsibilities of the delegation fall to the athlete herself/himself or to their representative such as coach, parent, or guardian.

National delegations have rights to

- a) Have athletes represent their country in international competitions.
- b) Make inquiries about the difficulty scores of an athlete when Superior Jury is present at the competition.

6.1 NATIONALS DELEGATIONS' RESPONSIBILITIES

- a) All members of the delegation must act in professional manner during the event. All complaints against POSA or the competition organizer must be made with email.
- b) Ensure all delegation wears matching national tracksuit (including coaches and guardians)

7 DETERMINATION OF SCORE

Routines are scored based on artistry, execution, and difficulty.

7.1 JUDGING PANEL

The POSA believes the duty of judges is to act impartially in Aerial sport competitions. This duty carries with it an obligation to perform with accuracy, fairness, and objectivity through an overriding sense of integrity.

Depending on the level of the competition, the judging panel may consist of five to thirteen judges. There should always be, if possible, at least five artistic and five execution judges, so the scores can be calculated as average where highest and lowest value are ignored.

7.1.1 Artistic Judges (A-J)

- a) They will be awarding points on dynamic movements, combinations, artistry, and level of difficulties of all moves performed in the routine.
- b) Can award up to 70 points.

7.1.2 Execution Judges (E-J)

- a) They will be deducting points on the technical aspects of all movements performed including correct lines, falls and much more.
- b) They may deduct up to 75 points.

7.1.3 Difficulty Judges (D-J)

- a) They will confirm difficulty moves and bonuses have been performed to the minimum requirements.
- b) They will deduct if a difficulty move has not been attempted.
- c) They will deduct if the difficulty moves have been performed in the incorrect sequence.

7.1.4 Head Judge

The head judge is responsible for overseeing all the judging.

Head Judge will,

- a) work with the judges to make sure their judging experience is as smooth and as impartial as possible
- b) with the judging systems coordinator to make sure scores are correctly input

The Head Judge is responsible for answering all questions raised by judges, coaches and members of the public should they arise.

7.2 SUPERIOR JURY

The Superior Jury is responsible for controlling the work of all judges and the Head Judge according to the rules and to guarantee a correct publication of the final scores. It registers the deviations of the judges' scores. If there are repeated deviations, the Superior Jury has the right to warn and replace a judge. Violations of instructions from the Superior Jury or the Head Judge may result in sanctions, as declared by the President of the POSA and the International Judges Coordinator.

Superior Jury is mandatory **only** at international competitions.

7.3 FINAL SCORE CALCULATION EXAMPLE

Artistic Score	39 points
Execution Score	75-30 points = 45 points
Difficulty Score (for individuals)	0.5 + 0.5 + 0.5 + 0.5 + 0.5 + 0.5 + 0.5 + 0.5 + 0.5 + 0.5 = 5 points
Difficulty Score (for doubles)	0.5 + 0.5 + 0.5 + 0.5 + 0.5 = 2.5 x 2 = 5 points
Difficulty Deductions	-4 points (two missing element categories)
Difficulty Bonuses	+2 points (two combination bonuses)
Head Judge Deductions	-3 points (extra acrobatic element)
Final Score	39+45+5-4-3 = 84 points

Note: For Doubles & Trio the Difficulty Score is multiplied by two (total score only without bonuses) to make individuals and Doubles/Trio scores comparable. It applies to competitive athletes only.

7.4 TIE BREAKING RULES

In case of a tie, the tie will be broken based on the following criteria in this order:

1. the highest total score in **Execution**
2. the highest total score in **Artistic**
3. the highest total score in **Difficulty**

7.5 INQUIRIES

An inquiry is a verbal challenge of the score of an athlete's routine, valid only between the time the athlete's final score is posted and before the end of the next athlete's routine.

Inquiries must be made to the head of the Superior Jury and confirmed in writing within four minutes of the verbal inquiry. Inquiry is made by the head of the national delegation.

Inquiries are only allowed for difficulty scores in competitions where Superior Jury controls the judging. If Superior Jury has not been placed for competition, all results are final.

Everything is specified in the **Work Plan**.

8 DIFFICULTY JUDGING

The difficulty of the routine is determined by Difficulty Elements evaluated by the Difficulty Judge. Elements are valued from 0.1 to 1 and divided to five groups:

Aerial:

Group A – Flexibility elements

Group B – Strength elements

Group C – Balance elements

Group D – Dynamic elements

Group E – Spinning elements

Routine must include at least **one** difficulty element from each group. **For doubles the Difficulty Score is multiplied by two (total score only, without bonuses) to make individuals and doubles scores are comparable. For Doubles, all difficulty elements must be performed in synchronization and without contact to the other athlete (this part is about Trio also). For Doubles & Trio the Difficulty Score is multiplied by two (total score only, without bonuses) to make individuals and doubles scores are comparable (it applies to competitive athletes only).**

For doubles: it is recommended to perform all difficulty elements synchronously. **At least one element must be executed synchronously in any case.**

- Due to the peculiarity of the aerial silks \ hoop, athletes are allowed to touch each other during the execution of the element, but athletes should not make any effort to help a partner. If athletes help each other, the element is not counted
- If it is not possible to perform the mandatory element synchronously, then the element can only be performed by one athlete. In this case, the second athlete must be on the projectile. If the second athlete is on the floor, the element cannot be counted
- All elements must be executed sequentially. It is forbidden to perform two different difficulty elements at the same time.

The doubles receive a -2 penalty from the difficulty judge in terms of difficulty if at least 1 difficulty element is missing from the competition program, performed synchronously

Note: athletes competing in doubles category must perform 4 lifts on the aerial silks \ hoop and 1 lift on the floor. Otherwise, a penalty of -1 will be charged for each missing lift.

In addition, the doubles must necessarily perform a dance sequence on the floor synchronously at least 10 seconds.

The Difficulty Judge evaluates **only the minimum requirements** of the elements. These requirements and the technical values could be found from the elements table. Element groups have general requirements that affect all the elements in that group. Some elements also have specific requirements.

8.1 DEDUCTION FOR A MISSING GROUP OR ELEMENT

- a) If athlete fails to perform any element in a group to an acceptable degree and therefore, does not get any points from that category, athlete is penalized 2 points (individuals) / 1 point (doubles) for missing.
- b) If declared element is not performed at all, athlete is penalized 3 points for missing element.

Note: Element is interpreted as missing if the judge cannot see the athlete perform or even attempt to perform the element. Element is not missing if it is performed but does not meet the minimum requirements and is therefore not scored.

Element is also interpreted as missing if it has not been declared at all. For example, athlete has only declared 9 moves. 10th move will be missing since it has not been declared.

8.1.1 Disqualification for missing elements

If athlete does not perform **any** of their declared elements, their performance is disqualified and will not be evaluated.

Note: In case athlete returns a difficulty sheet without any elements, the Head Judge must give the athlete a warning, deduction of 3.0 points and a possibility to select elements before the competition starts. At least one element must be chosen to be allowed to compete.

8.2 DEDUCTION FOR INCORRECTLY FILLED DIFFICULTY SHEET

If the sheet is filled incorrectly, the Head Judge will ask the athlete to modify their sheet and the athlete is deducted 3 points. This type of deduction is assigned in case the athlete has delivered the hand-written Difficulty Sheet, or if the athlete has declared one or more elements not provided for in his/her own range of choice, or in case of incorrect declaration of Combinations Bonuses (for example if the athlete declares 5 combinations, etc.)

8.3 SCORING OF ELEMENTS

- a) When athlete performs a difficulty element and all the requirements are fulfilled, the element is valued, and the value of the element is added to her difficulty score.
- b) In some elements, value of the move may be **downgraded** by 0.2 or 0.4 points, if the move is executed correctly, but is slightly above or under the correct line.
- c) If minimum requirements are not fulfilled, element is valued 0.

8.3.1 Benefit of Doubt

Judges must ensure that all the minimum requirements are fulfilled. In cases of doubt, the benefit of that doubt must be given to the athlete and the element must be valued.

Note: In case the element is performed in such angle that the judges cannot see it clearly, no benefit of the doubt is given, and the element is valued 0.

Use of V.A.J. (Video Assistant Judges) and cooperation with the Superior Jury As you know, over the last few years, starting with the 2021 World Championships in Bologna (Italy), the jury has begun to adopt VAR (Video Assistant Referee) as in football.

Preferring to being called Judges rather than Referees, we therefore thought it would be more correct to call our Video Assistant Judges.

The VAJ used in Pole & Aerial Sport competitions is used to help the Head Judge and the difficulty judges making correct decisions, especially in dubious or controversial situations. During a competition, all judges must use the VAJ, including, of course, the Superior Jury.

Usually, the Superior Jury is positioned differently from the other panel of judges, often slightly to the side, so that from their VAJ, it is possible to understand even better and more accurately, from a different angle, whether the technical element has been performed in accordance with the minimum requirements of the Code of Points.

There must be continuous dialogue between the Superior Jury and the jury panels regarding the elements that are assigned or not assigned, as the result must be identical. Any differences would lead to unclear situations that would jeopardize the credibility of the entire jury.

The International Federation is evaluating the possibility of installing video cameras on the competition stage that can show the entire performance from both a bird's eye view and a side view. This will obviously be connected to the judging panels, who will still be able to use their own video cameras.

8.4 GENERAL REQUIREMENTS

AERIALSPORT

8.4.1 A – Flexibility Elements

- a) Elements must be held in fixed position for at least 2 seconds.

8.4.2 B – Strength Elements

- a) Elements must be held in fixed position for at least 2 seconds.

8.4.3 C – Balance elements

- a) Elements must be held in fixed position for at least 3 seconds.

8.4.4 D – Dynamic Elements

- a) Element must have an aerial phase and dynamism.

8.4.5 E – Spinning Elements

- a) Element must meet all original minimum requirements and have a minimum 720° rotation in fixed position.

8.5 20° TOLERANCE (FLEXIBILITY ELEMENTS)

For **athletes in masters 50+ category** a tolerance of 20° is given to flexibility elements having a requirement of 180° opening of the legs,

- a) if the move does not have option for 160° opening.
- b) Moves that do have different levels of execution (such as jade or chopstick) are evaluated without tolerance

8.6 DOWNGRADE OF VALUE (GROUP A, B & E* ELEMENTS SILK \ HOOP ONLY)

Elements from the A, B & C groups have option for downgrade. Downgrade refers to the slight deviation in the execution of parallel line to the floor **only**. Deviation must be within allowed tolerance 20° or 30°. Need for downgrade is evaluated by the Difficulty Judge during the performance and is not declared in advance.

For example, if element in group A or B has a minimum requirement of horizontal line to the floor and the athlete performs the element in otherwise correct way, but unfortunately slightly above or below the horizontal line, the value of the element will be added to the difficulty score but with downgrade of 0.2 or 0.4 points depending on the level of the deviation.

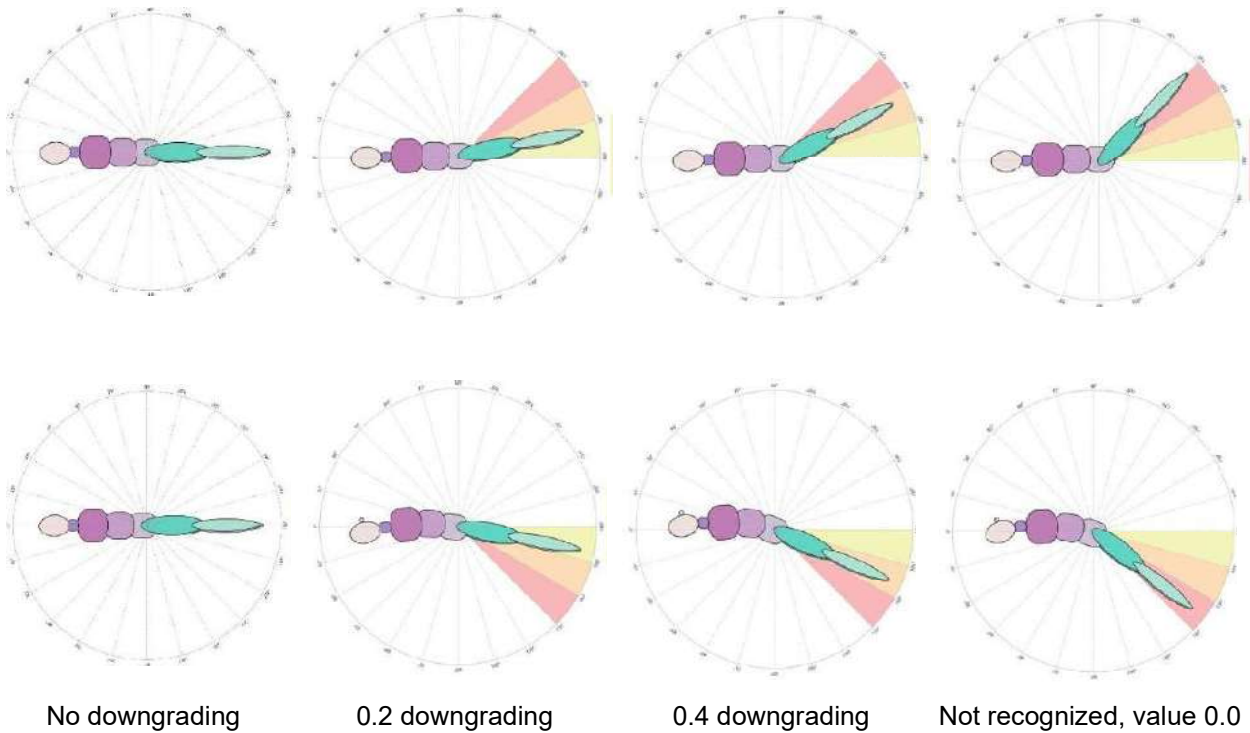

- a) If the line is within 20° tolerance, element will undergo a downgrade of 0.2 (1.0 becomes 0.8)
- b) If the line is between 20° and 30°, it will be downgraded to 0.4 (1.0 becomes 0.6)

*Group E: in case the athlete declares and performs an element of Group A, B or C as Group E, the downgrading will be possible with the same terms as the downgrading.

In this case, the Group E element can be downgraded.

Obviously, if the conditions are met (the same as for downgrading).

Note: The downgrade option refers only to the horizontal line specified in the elements table. Any other fault in the minimum requirements and the element will be valued 0 points.

8.7 CHOOSING THE ELEMENTS

8.7.1 Level of Difficulty

Athletes must choose their difficulty elements from the allowed range. Range is restricted based on category and division. Elements that are not from the allowed range are not evaluated and will be given value 0.

Amateurs' categories: Please note: the sixth element is **NOT** mandatory.

The athlete may not declare the sixth element.

However, if declared, the sixth element **must** be higher than the maximum allowed for the category.

Each element may only be chosen once. Flexibility elements with different levels on execution are considered as a same element. See more at section 8.7.

Category	Amateurs	Competitive
Varsity	0.1 – 0.3 + 6h element 0.4 or higher	0.1 – 0.6
Junior A Ind. & Doubles	0.1 – 0.4 + 6h element 0.5 or higher	0.1 – 0.7 + Athlete may declare an element with a value higher than 0.7
Junior B Ind. & Doubles	0.1 – 0.5 + 6h element 0.6 or higher	0.2 – 0.9 + Athlete may declare an element with a value higher than 0.9
Junior Doubles Mix	0.1 – 0.5 + 6h element 0.6 or higher	0.2 – 0.9 + Athlete may declare an element with a value higher than 0.9
Senior Ind. & Doubles (Senior Doubles Mix also)	0.1 – 0.5 + 6h element 0.6 or higher	0.3 – 1.0
Masters 40+	0.1 – 0.5 + 6h element 0.6 or higher	0.2 – 0.7 + Athlete may declare an element with a value higher than 0.7 but only as the last declared element
Masters 50+	0.1 – 0.4 + 6h element 0.5 or higher	0.2 – 1.0

Note: These restrictions effect only to the difficulty elements. Athletes can perform lower-scored elements without declaring them as difficulty elements. However, all amateur athletes performing any

element with a score higher than the maximum allowed for their category (unless it is the permitted sixth element for Aerial & Pole Sport amateurs) will result in a -5 point penalty (each time) by the Head Judge per occurrence, even if not declared on the Difficulty Sheet.

8.7.1.1 **EXCEPTIONS FOR AMATEUR DIVISION**

In Amateur division athletes may declare one extra element (6th element). **6th element is not mandatory**, but it must be valued higher than the normal maximum value of the category. For example:

- a) In Amateur Junior A category athlete may have one additional element from range 0.5 to 1.0
- b) In Amateur Junior B category athlete may have one additional element from range 0.6 to 1.0

Warning: The Difficulty penalty of -2 for lack of a Group, does not apply to the Amateur categories.

Effective January 1, 2026, all amateur athletes performing any element with a score higher than the maximum allowed for their category (unless it is the permitted sixth element for Aerial & Pole Sport amateurs) will result in a -5 point penalty (each time) by the Head Judge per occurrence, even if not declared on the Difficulty Sheet.

8.7.1.2 **EXCEPTIONS FOR COMPETITIVE JUNIOR CATEGORIES**

In Competitive Junior A and B categories **ONE** of the elements can have higher value.

- c) In Competitive Junior A category athlete may have one element from range 0.7 to 1.0
- d) In Competitive Junior B category athlete may have one element from range 0.9 to 1.0

8.8 **LEVELS OF EXECUTION IN ELEMENTS**

Elements with multiple levels of execution (such as Jade 160 and Jade 180) are considered as same element and **cannot be declared in same routine**. If same element or different level of element is declared more than ones, only the first will be evaluated and the rest will receive 0 points.

Elements with different levels of execution are marked on the elements table.

8.8.1 **Number of difficulty elements**

Athlete must choose five or ten difficulty elements, depending on the division. All element groups must be selected at least once. A deduction will be given for every missing element (-3 points) and element group (-2 points).

Category	Amateurs	Competitive	Paraathletes
Individual	5-6 elements	10 elements	No elements
Doubles	5-6 elements	5 elements	No elements

8.8.2 **Order of the elements**

Athlete must declare the elements in the order she or he is going to perform them in the routine. A deduction will be given if athlete fails to follow the declared order (-1 point each time).

For example: If athlete declares moves A, B, C and performs them in order B, C, A. There will be a deduction -1 each time for the incorrect order of the moves (in this case -3).

8.9 COMBINATION BONUS(CB) AND ADDITIONAL DIFFICULTY BONUS (ADB) AKA SUPER BONUS

Maximum 5.0 points can be achieved with combinations.

A bonus of 1 point is given, when.

- a) athlete combines two difficulty elements from different element groups and
- b) both of elements meets the minimum requirements (fully or downgraded) and
- c) direct transition between the two elements is executed without stop or hesitation.

If combination is not recognized (it does not meet the requirements listed above), both elements could still receive their value, but no additional deduction is given. Athlete must declare all bonuses in the difficulty sheet. There is no deduction for unaccepted combinations.

Combination bonus may be received maximum three times.

8.9.1 Additional Difficulty Bonus (or Super Bonus)

Athlete may also declare one extra combination between **two elements valued 1.0**. Combination is evaluated based on same minimum requirements as regular combination bonus.

Combining two high level moves is rewarded with 1.0 points for the combination plus 1.0 for the additional difficulty (2.0 points in total). This additional bonus can only be received once. **This type of Bonus applies only to the following competitive categories: Senior Women, Senior Men, Senior Doubles, Master +50, Trios Senior**

8.9.2 Combinations & Downgrading

Two elements combined and declared, can be downgraded (**only if the conditions for downgrading are met**). In that case, the bonus of 1 point will be awarded, but with the different value of the elements.

Downgrading and Super Bonus

If one or both elements of a Super Bonus are downgraded, **no bonus** can be awarded.

Only the values of the downgraded elements will be awarded as if they were not declared in combination.

8.10 RISK FACTOR BONUS(RFB)

A bonus of 1.0 point is given, when:

- a) athlete performs difficulty element in a way that includes a higher risk, such as high at the silk, iat the hoop - with high level of dynamism

An example of a high degree of risk on aerial silks:

- any dynamic element with a complete separation from the silks
- elements marked RFB at a height of 4 meters and above

An example of a high degree of risk on the aerial hoop:

- a complex dynamic element with complete separation from the ring
- elements marked RFB at high rotation speed

- b) the element meets all the minimum requirements

Risk Factor Bonus may be received for maximum **two times**. Risk Factor Bonus is assigned by the Difficulty Judges and is **not** declared by the athlete.

Any element that could give the Risk Factor Bonus depending on how it is presented, is marked in the box with the acronym "CBRF" (Could Be Risk Factor). This acronym has been added to help athletes understand how to get this bonus from the Difficulty Judges.

8.11 FINAL ELEMENT BONUS (FEB)

This bonus consists of the athlete's ability to declare and then perform as the last element of the routine, a movement of between **0.8** and **1.0**

- If the last declared element has a value of **0.8** and is obviously completed and executed meeting all minimum requirements, the athlete will receive an additional bonus (awarded by the Difficulty Judges) of **0.5**
- If the last declared element has a value of **0.9** and is obviously completed and executed meeting all minimum requirements, the athlete will receive an additional bonus (awarded by the Difficulty Judges) of **0.8**
- If the last declared element has a value of **1.0** and is obviously completed and executed meeting all minimum requirements, the athlete will receive an additional bonus (awarded by the Difficulty Judges) of **1.0**

The 'last element' is defined as :

- the tenth move in the list of Difficulties for a Competitive athlete
- the fifth (or sixth) move in the list of Difficulties for an Amateur athlete

This bonus can be applied to all categories in Aerial Sport regulations, including the Master +40 Competitive category, as we will only allow the athlete to declare one element above 0.7

Please note: obviously the only element with a value above 0.8 must necessarily be declared as the last movement, otherwise, the element will not be credited, and the athlete will suffer both a general penalty of -3 from the Head Judge for incorrectly filling out the Difficulty Sheet and a specific penalty of -3 from the Difficulty Judge for missing an element.

The FEB does not apply to the Junior Varsity Competitive category for the following reasons:

The Technical Committee believes that protecting athletes aged 6 to 9 is very important, and therefore, in the Competitive Varsity category, it has been decided not to allow the tenth element to exceed the maximum value permitted by the Code of Points. On the contrary, the Committee has allowed the FEB to be applied to the Varsity Amateur category, given that the maximum number of elements allowed is six, so the last element would be the sixth and not the tenth.

8.12 BONUS CONNECTIONS (BC)

This bonus, unlike the FEB (which is awarded automatically by the jury if the last movement is between 0.8 and 1.0), **must** be declared by the athlete in the Difficulty Sheet.

Bonus Connections means the declaration of three consecutive elements, which are already declared as two single bonuses, but if completed correctly, will receive an additional 1 bonus point (i.e. Bonus Connections). This type of bonus in some categories*(as specified at the end of the paragraph) may be declared 'partial', i.e. declared only once

***Categories that cannot declare a Super Bonus.**

Here is the example below:

C074+B072+D026= +1+1 (BC= 1)

C+B are the first combination, which will then receive the **+1 bonus** (Already envisaged by the Code of Points, of course in case it is executed with all the minimum recognised requirements),

B+D are the second combination, which will then receive the **+1 bonus** (Already envisaged by the Code of Points, of course in case it is executed with all recognised minimum requirements).

If the entire combination is **successfully performed** (thus no loss of any elements), the athlete will receive an additional **+1 bonus point**.

The BC can be declared twice in the entire performance, **but since the total number of declarable bonuses remains 4 (three +1 & one +2 Super bonus), the second BC must necessarily contain the Super bonus in the entire sequence.**

Here is an example below: A067+B071+D046

A+B are the first combination, which will then receive the **+1 bonus**(Already envisaged by the Code of Points,of course in case it is executed with all the minimum recognised requirements),

B+D are the second combination, declared as Super Bonus which will then receive the **+2 bonus**(Already envisaged by the Code of Points,of course in case it is executed with all recognised minimum requirements).

The BC (full) only applies to the following categories:

- Senior Competitive (individual males and females)
- Masters+50

The BC (partial) applies to the following categories:

- Juniors Competitive & Varsity Competitive
- Masters+40 Competitive
- Senior Double Competitive
- All Amateur Categories

Bonus Connections & Downgrading of the moves

- If one or more elements are downgraded during the sequence, is it still possible to receive the BC?

Yes, it is still possible.

The BC is only not assigned if an element of the entire sequence receives zero (0).

- If an element declared as SB is downgraded within the sequence, is it still possible to receive the BC?

No, it will not be possible.

Obviously, in this case, you will also lose the value of the Super Bonus (as per the Code of Points).

8.13 INCORRECTLY FILLED DIFFICULTY SHEET

If athlete fails to follow the instructions given by the code of points, local organizer or the Head Judge and it requires corrections, a deduction of 3 points is given by the Head Judge.

Such errors include, but are not limited to:

- a) Missing element in any group
- b) Forbidden combination
- c) Switching moves
- d) Incorrect amount of difficulty elements
- e) Elements selected are not from the allowed range
- f) Declare the Risk Factor Bonus
- g) Fill out the Difficulty Sheet by handwriting
- h) Deliver a photograph of the Difficulty Sheet

The Difficulty Sheet, therefore, cannot be handwritten and a photograph of it cannot be sent.

We accept only computer-compiled Difficulty Sheets sent in Word and/or PDF formats.

Athletes may be allowed to make changes to their sheet when errors are pointed out or they might choose to continue without any changes and accept the deductions this will cause to their difficulty score. **In case of**

change of one or more elements in the Difficulty Sheets, the athlete must bring it directly to the jury on the day of the competition in 8 copies.

Note: Deductions should not be given, if the athlete provides new correctly filled sheet before the competition starts.

8.14 SUMMARY OF DIFFICULTY DEDUCTIONS

- a) Element performed not in order of appearance: -1 each time.
- b) Missing Group of the Element Pool: -2 each time (-1 for Doubles).
- c) Missing an element declared: -3 each time
- d) Incorrectly filled difficulty sheet: -3 one time
- e) At least 1 difficulty element, performed synchronously, is missing: -2 one time (for Doubles).
- f) For each missing lift. -1 each time (for Doubles).

9 EXECUTION JUDGING

The Execution Judges evaluate the technical execution of all movements including moves and transitions on the aerial silks / hoop and floor work. For Doubles judges will also evaluate the timing and uniformity of all movements, as well as the ability to execute the routine as a single unit in synchronization.

Note: Uniformity means, that the doubles should strive to perform the elements identically, with same level of flexibility, strength and technical skill and therefore appear as equals.

The athletes are expected to include in the routine, only elements that they can perform with complete safety and with a high degree of aesthetic and technical skill and with perfect execution.

Each athlete has the possibility to get 75 points from execution. Each error is deducted from the starting amount. At the end, whatever is left of the 75 points is the athletes total execution score.

Maximum number of deductions is 75 points. If athlete receives more deductions the total amount of execution score is still 0. The total execution score cannot be a negative value.

9.1 TECHNICAL MISTAKES

Any deviation from perfect execution is deducted by the Difficulty Judges. The number of points deducted is dependent on the level of infringement.

	Small	Medium	Large	Very Large
	0.5	1.0	2.0	5.0
<p>Poor Execution</p> <p>Any inability to perform movements with perfect technique in maximum precision, correct posture, body alignment or inadequate physical capacities (such as active and passive flexibility, strength, amplitude, power, or endurance).</p> <p><u>Examples of poor execution:</u></p> <p>Knee and toe alignment: The knee and toe should be aligned. There should be straight line from the kneecap to the big toe. The foot and toe should be pointed. The toes should not be clenched or showing tension. No unnecessary grabbing or gripping the silk \ hoop.</p> <p>Clean lines: The legs and arms should be correctly positioned and at full extension, feet and toes should be pointed. Fingers and toes should not show tension and feet should not be flexed unless performing an aerial walk or if it is a choreography choice.</p> <p>Extension: Legs, arms, back, neck wrist and torso line should be fully lengthened. The shoulders and/or back should not be rounded and the head should be high showing no strain.</p>	0.5			
<p>Poor transitions between elements</p> <p>The transitions from element to another must be executed with ease and grace without hesitation, re-grips or rebalancing. Transitions should appear effortless</p>		1.0		
<p>Lack of uniformity or synchronicity (Doubles only)</p> <p>Inability to execute all movements as a unit, with identical range of motion, start and finish at the same time and be of the same quality. This also includes choreographic movements; each movement should be precise and identical.</p>		1.0		

<p>Bad Angle of the move</p> <p>Performing any element in the routine at an unfavourable angle. When using dynamic silk / hoop, the athlete must demonstrate absolute control to avoid the stop of silk / hoop in the element with unfavourable angle.</p>		1.0		
<p>A slip or loss of balance</p> <p>A <u>temporary loss of control</u> on the silk \ hoop or a clear loss of balance during a choreographic element. <i>A minor slip or loss of balance is considered as poor execution. In minor case the slip is not affecting the flow of the performance and athletes is able to continue as planned.</i></p>		1.0		
<p>Drying hands-on costume, body, Silk /Hoop or floor and/or fidgeting with hair or costume</p>			2.0	
<p>A Fall</p> <p>Sudden rapid uncontrolled and catastrophic drop onto the floor. This can be from any position on or off the silks \ hoop.</p> <p><i>If athlete can regain her/his control before landing, the error is considered as a slip.</i></p>				5.0

9.2 GENERAL MISTAKES

General mistakes are deducted at the end of the performance. These deductions are made only once. Depending on the level of error a deduction of 3.0 or 5.0 is given.

	Large	Very Large
	3.0	5.0
<p>Not using potential of silk/hoop</p> <p>Athlete must work both on joint and separate silks and show different elements (knots, different grips etc), while performing on the aerial silks. For aerial hoop – athlete must use the spanset.</p>	3.0	
<p>Using less than 70% of the apparatus</p> <p>The athlete will incur deduction points example if they fail to use 4 m of the height of aerial silks during their performance. For doubles, at least one of the athletes must use the full height of the silk. Full height is used when athlete's hands or feet's reach above the 4m of the silks.</p>	3.0	
<p>Lack of uniformity or synchronicity (Doubles only)</p> <p>If majority of the performance is not in synchronicity, doubles will incur an additional deduction. This deduction is given, when three single deductions have been given for synchronicity in technical errors.</p>		5.0

10 ARTISTIC JUDGING

This section is to judge the athlete's artistic presentation, interpretation, and stage routine.

Artistic presentation is the way in which the athlete expresses and presents him or herself to the judges. The judges will assess the athlete's ability to convey emotion and expression through movement. They should be confident, engaging, entertaining and show a high level of stage presence in each element of their routine on and off the silk \ hoop. The athlete should create an original routine and display a unique style. The overall routine should flow seamlessly and effortlessly ensuring that highs and lows (shades) are demonstrated.

Choreography presentation is defined by all moves undertaken around the silk \ hoop, stage area, or stage surface, but not in contact with the silk \ hoop. The judges will assess the athlete's ability to undertake dance and acrobatic choreography that is executed with imagination, flow, and flair.

10.1 SCALE OF ARTISTIC SCORING

Athletes will be awarded points based on **overall level** of each section in the routine.

0-0.5 = Unacceptable

1-1.5 = Poor

2-2.5 = Satisfactory

3-3.5 = Good

4-4.5 = Very good

5 = Excellent

Bonus points: 0.5= satisfactory, 1=good, 1.5= very good, 2= excellent

General Content scale: 1.0-1.1 = unacceptable, 1.2-1.3= poor, 1.4-1.5= satisfactory, 1.6-1.7= good, 1.8-1.9= very good, 2.0= excellent

Maximum total score in artistic is 70 points.

10.2 SCORING SECTIONS IN ARTISTIC EVALUATION

A maximum of **70** points can be given in the artistic and choreographic presentation. This section is to judge the artistic presentation, the interpretation, and the routine of the athlete. The artistic presentation is the way in which the athlete expresses himself and presents himself to the judges. The judges will evaluate the athlete's ability to convey emotions and expressions through movement. Athletes should be engaging, entertaining, expressive and show a high level of stage presence in every element of their silk \ hoop and ground routine. The athlete should create an original routine and show a unique style. The general routine should flow seamlessly and effortlessly ensuring that highs and lows (nuances) are demonstrated. The presentation of the choreography is defined by all the moves taken around the silk \ hoop, on the surface of the stage, but not in contact with the stake. The judges will evaluate the athlete's ability to undertake dance choreography performed with imagination, fluency, and talent.

Athletes must demonstrate 30 seconds of choreography on the floor as minimum.

10.2.1 Creativity and complexity of the choreography

This refers to the originality of the overall presentation including the theme, music choice, costume, and the originality of choreography throughout the entire routine.

Athlete should create surprising and emotional choreography, that is original and memorable. Routine should create a character or persona and a story.

Examples of poor creativity and complexity in overall presentation

- There is no artistry, routine is purely an athletic sequence of elements.
- Choreography does not tell a clear story.
- Athletes' movements do not reflect the story or the music.
- Selected music is worn out or unimaginative.
- Choreography is repetitive, flat and does not develop during the performance.

- There are no especially impressive moments or surprising twists to the performance, routine is predictable.
- Choreography requires truly little technical skill or is executed in very poor manner.
- Different sections of the choreography appear unconnected.

10.2.1.1 ORIGINALITY OF THE OVERALL PRESENTATION

This refers to the originality of the overall presentation of moves and combinations, original movement on and off the silk \ hoop and the originality of choreography throughout the entire routine. The athlete should create original combinations of moves and create new themes in choreography. Judges are not just looking for just one or two unique moves but for overall originality in all components of the routine. **Max 5**

10.2.1.2 ORIGINALITY OF TRANSITIONS IN AND OUT OF MOVES & CONFIDENCE

This refers to the originality of all transitions, entrances, and exits of moves and combinations in the entire routine. The athlete should create new and original movements for their transitions in and out of moves and on and off the pole. Confidence refers to the athlete's level of confidence in his or her routine. The athlete should not show nerves, but rather carry him or herself with confidence and be engaging, command the stage and the audience's attention, making their routine look believable throughout. **Max 5**

10.2.2 Creativity and complexity of transitions and elements

Level of creativity, originality and complexity in all elements, transitions, and combinations in the entire routine. The athlete should create new and original movements for their transitions in and out of elements and on and off the silk \ hoop.

Examples of poor creativity and complexity in transitions and elements

- Athlete shows no creativity or originality; variations are simple and well-known.
- The routine repeats itself; elements, climbs, inverts and/or lifts are or look similar.
- Athlete shows no technical skill. Chosen elements do not require coordination or physical capabilities.
- Athlete clearly does not have enough technical skill or physical capabilities for the chosen elements. Execution is messy and insecure.
- Athlete only performs difficulty elements on the silk \ hoop (lack of transitions).

10.2.3 Interpretation of the music, body and facial expressions

Interpretation refers to the athlete's ability to interpret the music, their facial expressions, their emotions, choreography and the creation of a character or persona and story. The athlete should create choreography that shows the light, shade, feeling and emotion of the music and their movements. They should connect with the music and show expression through their costume, body, and facial movements. They need to show they can work their choreography to the beat and phrase of the music and melody. **Max 5**

Examples of poor creativity interpretation

- Athlete does not perform to the right rhythm or misses the beats when they were clearly trying to perform to them.
- Music acts only as a background and is not part of the routine.
- Athlete forgets to perform, when executing parts of the choreography (usually on silk \ hoop).
- Stress and the challenges of the choreography are shown in their facial expressions.
- Emotions do not match the theme or the story, or there is none.
- Athlete only uses her face or part of their body to express and not their entire body.

10.2.4 Music & Musicality (Usage, selection & composition)

The routine must be performed, in its entirety, with music. Any style of music adapted for Aerials can be used.

Selection: a good musical selection will help establish the structure and pace, as well as the theme of the exercise. It will support and highlight the performance. It must also be used to inspire the overall

choreography and contribute to the style and quality of the choreography, as well as to the expression of athletes.

Since an Aerial routine is an artistic routine, the 'structures' which are built before the start of a routine, may be accompanied by a tone (It is could be an athlete's choice), sound environment or distinctive music in order to set the stage for the performance.

Every routine should have a story and the selected music must represent the story the athlete and the choreographer want to transmit.

The chosen music must give an advantage to the individual competitor's characteristics and style. The music must be suitable for the category and enhance the routine.

Some music themes can be used by man, woman, doubles. The way they use and interpret the music will determine and show if the selection was appropriate and helped to highlight the performance.

Composition & structure: The music used by the performers, should not be foregone, but original and not too heard during aerials competitions. Music may be dynamic, varied (not monotonous), rhythmical, original (creative), etc.

Technically the music must be perfect, without any abrupt cuts, giving a sense of one music piece. It should flow, with a clear start and clear ending, with well-integrated sound effects (if they are included), respecting the musical phrases.

The recording and mixing of music must be of professional quality and well-integrated

It is expected that the performers select music with a correct structure and with different parts (varied music), to avoid monotony of the music used.

The music used can be original or can be a version arranged with a base.

Usage: Musicality is the ability of the performer(s) to interpret music and to demonstrate not only its difficulty elements or technique, but its flow, shape, intensity, and passion within the physical performance. There must be strong cohesion between the overall performance (movements) and the choice of music.

Routine must be performed entirely to music. Choreography utilizes the idea given by the music.

All movements must fit perfectly with the chosen music.

In the creative process, the choreographer creates the movements to that specific music and for specific competitor(s).

Routine style must harmonize with the idea of the music. Music style should fit with the characteristics and style of the movements presented by the performers. The competitor should be able to express with his/her movements and his/her body language the music. **Max.5**

10.2.5 Stage Presence and Charisma

The athlete should command the stage. He or she should be in total control of their performance and carry him or herself with an impressive style or manner, which is both engaging and charismatic. **Max.5**

10.2.6 Correspondence of leotard to the theme

The costume or leotard should correspond to the theme of the routine, although the theme could be abstract. The costume should be in line with what the athlete is representing. **Max 2**

10.2.7 Declared Lifts (Doubles Only)

Doubles, in addition to the five difficulty elements to declare, must also perform the level of their lifts. Lifts are interconnected partner moves executed on the silk \ hoop or floor where both partners are in substantial role. Usually, one of the partners acts as flyer and other as base. Partners can lift, hang, or balance on each other.

Lifts are not predetermined, instead the doubles will have to use their creativity to invent their own lifts. **Max. 5**

Doubles must perform four (4) silk \ hoop lifts and one floor (1) lift.

10.2.7.1 LIFT TYPES

Strength/Strength: When both athletes perform a strength move together, both are in a position that requires force, strength of the arms, core, or legs, holding and controlling their position.

Flex/Flex: When both athletes perform a flexibility move together, both are performing a move that requires flexibility of the legs, back, or shoulders, performing it with full motion and extension.

Strength/Flex: When one athlete is in a position of flexibility and the other is in a position of strength, holding and controlling both positions together, in contact with each other
Interlocking: When both athletes perform a move that requires them to be interlocked by hooking or joining arms, elbows, legs, knees, backs, etc. Both athletes are executing the same position in either the same direction, in mirror horizontally (left and right) or in mirror vertically (upside-down, upside-down).

Balance: When both athletes are in a position together that requires them to combine balance, strength, and flexibility to maintain the position. This position is impossible to do without one of the athletes, it is only possible when both are in the right position because they require the weight, counterbalance, and the help of the other partner to stay in position. It is a balance; counterpoise and combined forces move that involves both athletes as one.

Base supported: When one athlete is totally supporting the other by holding on the pole. Both can have contact with the pole, but only one is supporting the other, and the other is suspended, hanging. It is not mandatory that the supported athlete is in a lower position.

Floor: Concerns all the lifts performed on the floor, without touching the silks/hoop.

10.2.7.2 VALUE AND ASSESSMENT:

Lifts are valued on three levels: 0.5, 0.8 and 1.0. The individual elements at the code of points serves as a guide to assess this level.

Lower level (0.5): athletes can follow the examples given (see below) or can perform movements that have maximum value of 0.6 in the code of points (at least one partner must be in a position that has those points);

Medium level (0.8): athletes can perform movements that have value between 0.7 and 0.8 points in the code of points (at least one partner must be in a position that has those points).

Higher level (1.0): athletes can perform movements that have value between 0.9 and 1.0 points in the code of points (at least one partner must be in a position that has those points).

10.2.7.3 LIFTS

The Doubles will have just to execute the lifts in their routines. **Artistic Judge** will evaluate during the performance (in order of appearance) if the lift fulfils level.

10.2.7.4 EXAMPLES OF LIFTS

<p>Strength/ Strength</p>	<p>0.5</p>	
	<p>0.8</p>	
	<p>1.0</p>	
<p>Flex/Flex</p>	<p>0.5</p>	 
	<p>0.8</p>	

	1.0	
Strength/Flex	0.5	
	0.8	
	1.0	
Interlocking	0.5	
Base supported	0.5	

	0.8	
	1.0	
Balance	0.5	
	0.8	
	1.0	
Floor	0.5	  
	0.8	  

	1.0			
--	-----	---	--	---

10.2.8 Balance choreography

The athlete should create a balanced routine of different types of moves e.g., floor-work, transitions, in and out of aerial silks \ hoop integrating these into a choreography with stage presence and artistic content. Elements and choreography should be performed at all levels: floor level, medium level, and aerial (higher than 70% of the silk \ hoop). **Max. 5**

Examples of poor balance of choreography

- Athlete does not use silks \ hoop and mainly uses them at single level.
- There is visibly difference between skill level in different sections of the choreography. For example, floor work is much more advanced than silk \ hoop work.
- Athlete does not control the spinning silk \ hoop, or the spinning motion is powerless.
- Not performing any physical interactions (Doubles).

10.2.9 Balance elements (Singles Only)

Balance refers to the athlete's ability to create a well-balanced routine that has an equal number of various elements. The athlete should create a balanced routine of different types of elements as flexibility, strength, spins, and dynamic movements. Athlete should appear evenly skilled in these capabilities. **Max.5**

Examples of poor balance of elements

- Athlete does not perform movements from a single element group or is clearly less capable in one.

10.2.10 Dynamic and Flow

Flow refers to the athlete's ability to create a seamless and effortless routine. The athlete should show a flow off the aerial silks \ hoop, and from floor to standing or from standing to floor. The sequences, moves, transitions, choreography and/or acrobatic movements should flow in a seamless, smooth, natural, flawless, and graceful way. Movement in and out of moves should continue to the next move faultlessly. The routine should not look disjointed in anyway. An athlete should be marked down if they perform moves and wait for applause. Max 5

10.2.11 Intensity

Intensity refers to the level of coronary intensity of the routine, the level of body use (body segments), the intensity level of transitions, and the choreographic dynamism of the athlete. **Max 5**

10.2.12 Use of the space

Use of stage refers to the athlete's use of all the stage. The athlete should use the whole stage - front, on the both sides of mats, except on the back of mats. Athlete must use us minimum 4m of aerial silks. There should be a balanced use of the 3 level of use of the space: floor level, medium level, and aerial (Floor, Upright and Aerial higher than 70% of the silk \ hoop). **Max 5**

10.2.13 Difficulty of Floor Work- Choreography Content

The difficulty of the floor work refers to a choreographic combination of dance steps and movements performed on the floor without any contact with the silk \ hoop. The difficulty of the floor work is judged in its entirety, in a continuous sequence without interruptions. The athlete should create dance movements appropriate to the rhythm of the music and that they reflect the character of the routine.

Choreography Content: In the Choreographic Content, we evaluate the level of Choreographic Movement throughout the routine.

The quality (perfect technique) of the Choreographic Movement is especially important to be recognizable as a complex dance sequence or simply a good choreography.

Choreography, must include variations of steps with arm movements, utilizing movements to produce complex combinations with a high level of body coordination and must be recognizable as “big” continuous movement. **Max 5**

Use of body segments bonus: Choreography is the base of Aerial and main (principal) characteristic. Therefore, the complexity and variety of the choreography, are the most important criteria under the Choreographic Content. The athlete should show good use of the body segments during the choreography, using both the upper part (torso and arms) and the lower part (pelvis and legs). Every use of body segment sequence will be written with symbol A. **Max 2**

10.2.13.1 SHORTHAND FOR CHOREOGRAPHYC CONTENT (BODY SEGMENTS)

Every use of body segment sequence will be written with symbol **A**

A+	If the body segments sequence meets the criteria mentioned above
A	If the body segments are not + or –
A-	If the body segments sequence does NOT meet the criteria mentioned above

10.2.13.2 SCALE FOR USE OF BODY SEGMENTS

Excellent 2.0 pt	A+ A+ A+ A+ (4 A+)
Very Good 1.5 pt	A+ A+ A+ A (3 A+)
Good 1.0 pt	A+ A+ A A (2 A+)
Satisfactory 0.5 pt	A+ A A A (1 A+)
Poor 0.0 pt	A A A A (0 A+)

Style of dance movements bonus:

If the athlete clearly shows a good dance style, the athlete can be rewarded with this additional bonus. Every 8-count of music sequence will be written with symbol D. **Max 2**

10.2.13.3 SHORTHAND FOR STYLE OF DANCE MOVEMENTS

Every 8-count of music sequence will be written with symbol **D**

D+	If the movement sequence is performed in a CORRECT DANCE STYLE and meets the criteria mentioned
D	If the movement sequence is performed without DANCE STYLE and/or does NOT meet the criteria mentioned
Till 2.0	Mixing Style of dance sequence

SCALE FOR DANCE STYLE

Excellent 2.0 pt	D+ D+ D+ D+ (4 D+)
Very Good 1.5 pt	D+ D+ D+D (3 D+)
Good 1.0 pt	D+ D+ D D (2 D+)
Satisfactory 0.5 pt	D+ D D D (1 D+)
Poor 0.0 pt	D D D D (0 D+)

Mixing different Style of dance bonus:

If the athlete clearly shows a mix of dance styles (clearly distinguishable), maybe even using two (or more) different types of music, the athlete can be rewarded with this additional bonus. **Max 2**

General content:

General content of the routines is: Transitions/linking, Balanced Elements (Singles), Lifts (Doubles), Physical Interactions (Doubles).

Will take in consideration the movements, as a unit (performed in the same period), G per movement or a block a minimum of 4 movements (or set of movements) from the General Content. **Max 2**

10.2.13.4 SHORTHAND FOR GENERAL CONTENT

Will take in consideration the movements, as a unit (performed in the same period of time), **G** per movement or a block.

G+	Complex movements for General Content
G	No complex (but regular) movements for General Content

10.2.13.5 SCALE FOR GENERAL CONTENT

Excellent 2.0 pt	G ⁺ G ⁺ G ⁺ G ⁺ (4 G ⁺)
Very Good 1.8 -1.9 pt	G ⁺ G ⁺ G ⁺ G (3 G ⁺)
Good 1.6 – 1.7 pt	G ⁺ G ⁺ G G (2 G ⁺)
Satisfactory 1.4 - 1.5 pt	G ⁺ G G G (1 G ⁺)
Poor 1.2 - 1.3 pt	G ⁺ G G G (1 G ⁺) showing repetitions
Unacceptable 1.0 – 1.1 pt	G G G G (0 G ⁺)

10.2.14 Difficulty of the acrobatic element

The difficulty of the acrobatic movement refers to a single acrobatic movement performed on the floor without any contact with the silk \ hoop. The acrobatic elements on the floor are listed in the COP. **Acrobatic movement is not mandatory.** It is not considered acrobatic elements to the floor, all those acrobatic elements that end up or start on the silk \ hoop or that are executed with a support to the silk \ hoop. **Max 5**

Note: **Only one acrobatic element is allowed during the routine! Additional acrobatic elements will receive 3.0 points deduction (each time) from the Head Judge.**

10.2.14.1 DEFINITION OF ACROBATIC MOVE ON THE FLOOR:

It defines "Acrobatic Moves", all those elements on the floor (without touching the Silk \ hoop), with:

1 - An aerial phase in which the whole body is completely detached from the floor with a complete rotation (360 °), of the body forward, backward or to the side.

2- A floor-based phase, in which the whole body makes a complete rotation (360°) with a passage of the pelvis above the head, forward, backward or to the side (are included all those elements typical of rhythmic gymnastics that include a complete rotation also on the elbows or chest, as for example, the "fish"). Simple rolls forward / backward on the back of the neck, with or without the aid of the hands are not considered an acrobatic element.

3 - All those static movements on the floor without an aerial phase (for example, a handstand, a cartwheel, etc.)

Note: In static elements on the floor, such as handstand and forearm stand, additional 0.5 points can be given for variations requiring exceptional flexibility and balance (for example Mexian handstand).

Note: All the elements, if performed incorrectly from the point of view of execution (legs bent, incorrect lines, unbalanced hold.) should be downgraded by 0.5 points. Example: if an athlete performs a backward walkover with bent legs 3.0 must be downgraded to 2.5.

Note: If an athlete falls during the aerial phase or otherwise fails the landing, the acrobatic element will receive maximum 2.5 points.

10.2.14.2 SCORING FOR ACROBATIC MOVES

All images and descriptions of the elements are based on the definitions from Fédération Internationale de Gymnastique and are used here with permission from FIG. Pictures, videos and descriptions of the elements and variations can be found on www.fig-aerobic.com.

All acrobatic elements that are not in this list, will be considered as choreograph.

Dynamic acrobatic elements

	Handstand	1.0 (if it is passing). 1.5 (if exit to forward roll). 2.0 (if minimum 2s hold);
	Forearm stand The body is supported by both arms with only the hands in contact with the floor.	0.5 (if it is passing); 1.0 (if minimum 2s hold); 2.0 (if press up)
	Cartwheel	1.0 0.5 (elbow); 1.5 (on one arm);
	Round off	2.0 2.5 (if it is split landing);
	Walkover (forward)	2.5;
	Walkover (backward)	3.0 3.5 (if it is split landing or Wenson landing);
	Headspring	4.0 4.5 (if it is split landing)
	Handspring (forward)	4.0 4.5 (if it is split landing)
	Press up handstand	5.0 (with the handstand hold for 2 seconds)

	<p>Flic Flac</p>	<p>4.5 5.0 (if it is split landing)</p>
	<p>Salto 360° (forward, backward, or sideways)</p> <p>Salto with more than 360° or with twists are not allowed.</p>	<p>5.0</p>
	<p>Thomas Flairs</p> <p>From a straddle support on both hands, legs circle straddle around the body. Legs must not touch the floor during the circle.</p>	<p>5.0</p>

Static acrobatic elements

	<p>L-support</p> <p>Both hands are placed at the side of the body close to the hips. Legs closed. The body is supported by both arms with only the hands in contact with the floor.</p>	<p>2.0</p>
	<p>Straddle Support</p> <p>The body is supported by both arms with only the hands in contact with the floor. Both hands are placed in front of the body.</p>	<p>3.0</p>
	<p>Straddle V-Support</p> <p>The body is supported by both arms with only the hands in contact with the floor. Both hands are placed behind the body.</p>	<p>3.0</p>
	<p>Full Support Lever</p> <p>A support where the body is supported over the elbows and Triceps with only the hands in contact with the floor. Legs may be closed, straddle or any other position.</p>	<p>3.0 3.5 (on one hand)</p>

	<p>Planche</p> <p>A support in which the body is supported on both hands with straight arms. Legs may be closed, straddle or in other position.</p>	<p>5.0</p>
	<p>Wenson</p> <p>One leg is supported on the upper part of the Triceps of the same side. The rear leg is lifted off the floor.</p>	<p>2.5</p>

10.2.14.3 PROHIBITED ACROBATIC ELEMENTS

Following acrobatic elements and combinations are not allowed in POSA competitions:

- Salto more than 360° with or without twist
- Salto 360° with twist
- **Combination of two or more dynamic acrobatic elements** (for example flick flack to back walkover), a single static acrobatic element may be combined to a dynamic acrobatic element (such as handstand) as start or end position

All prohibited moves and combinations will receive 5.0 points deduction from the Head Judge.

11 HEAD JUDGE PENALTIES

When Superior Jury is not present, Head Judge is also responsible for the following acts:

- Extraordinary circumstances

11.1 SUMMARY OF DEDUCTIONS, WARNINGS AND DISQUALIFICATIONS MADE BY HEAD JUDGE

- a) Presentation fault: -1 one time
- b) Incorrect attire (jewellery, ornaments, body glitter/painting, national identity, etc.): -3 one time
- c) Improper behaviour on stage: -3 each time
- d) Failure to appear on the competition area within 20 seconds: -1 one time
- e) Prohibited moves: -5 each time
- f) Prohibited height on silks (more than 6m for JV 6-9) -5 one time
- g) Intentional swinging of hoop/silk - 5 one time
- h) 2nd or more of acrobatic elements: -3 each time
- i) Interruption of performance for 2-10 seconds: -2 each time
- j) Stop of performance more than 10 seconds: -3 one time
- k) Wrong length of music:
 - music is more/less than 3 seconds: -1 one time
 - a. music is more/less than 5 seconds: -3 one time
 - b. music is more/less than 10 seconds: -5 one time
- l) Incorrectly filled difficulty sheets: -3 one time
- m) No logical beginning or end of the performance: -1 one time
- n) Causing distraction by uttering vocals: -1 one time
- o) Verbal queues from the coach: -5 each time
- p) Contact or verbal instructions between spotter and athlete: -5 each time
- q) Non-compliance of interim rules in choreography on the floor (less than 30 sec)- 3 one time
- r) Themes in contravention of the Olympic Charter and the Code of Ethics: -10 one time
- s) Presence in prohibited area: warning
- t) Improper behaviour / manners: warning / disqualification
- u) National tracksuit or emblem not being worn warning
- v) Competition attire not being worn at medal award ceremony: warning
- w) Missing all difficulty elements: disqualification
- x) Drop out: disqualification
- y) Walk-over: disqualification
- z) Serious breach of the POSA Statutes, Rules & Regulations or Code of Points: disqualification
- aa) Un athlete like conduct against athletes: disqualification
- bb) Disrespectful behaviour towards the Head Judge and Jury: disqualification

12 DEFINITIONS

Correct angle in splits

The angle/degree of a split is measured by the lines formed by the inner thighs in alignment with the hips to the knees.

20° (degree) tolerance

The compulsory move will still be valid if the executed angle/degree of the body varies

no more than maximum 20° to the required angle/degree. If allowed, this will be indicated in the minimum requirements. E.g., a strength moves with a requirement of a 90° body angle to the silk \ hoop and parallel to the floor is executed at a 70° angle, body not fully parallel to the

floor will still be valid and awarded points.

However, points will be deducted by the deduction for poor execution.

*Please note: Masters 50+ are allowed a 20° tolerance on all angles and splits for Group A and B (flexibility and strength move).

Holding a position for two seconds

A compulsory move will be counted from the time the athlete is in the required position. The position must be fixed for two seconds (for balance elements – 3 seconds). The transition in and out of the compulsory move will not be counted towards the holding of a position. Please note this is intended for fair judging, enabling athletes to show correct form, body execution and strength on compulsory moves but not to deter from flow of movement.

Correct angle of an element

Moves not performed at angles clearly visible for the judges to see full execution, will be deducted points.

Transitions

A transition is a linking move between spins, floor work, inverts and lifts.

Floor work

Floor work is defined as a part of a performance where the athlete has no contact to the silk \ hoop. Floor work is every movement performed on the floor in a lying, crawling, kneeling or acrobatic manner.

Use of Space

Stage work is every movement performed around the stage in an upright position without touching the silk \ hoop.

Synchronization (Doubles)

Synchronization refers to the synchronization of the overall performance. This includes on and off the silk \ hoop \ silks \ hoop, around the silk \ hoop and the stage area as well as how well the partners work together throughout the whole performance. Synchronization also refers to the execution level of the partner tricks or combinations.

Lifts (Doubles)

Lifts are interconnected partner moves executed on the silk \ hoop or floor where both partners are in substantial role.

AERIAL & ARTS WORLD FEDERATION

CODE OF POINTS

Elements Table

Aerial sport

13 ELEMENTS TABLE

Note: Pictures at the elements table are only instructional and should not be interpret as the only correct execution. The drawings are only indicative, they are examples, the important thing is to read the minimum requirements carefully.

If you have any questions, please contact the international federation at contact@posaworld.org

Abbreviations and definitions:

Legs and body positions

Ext. / Extended	Legs extended straight in knees
Pike	Legs together, body bend in half from hips
Straddle	Legs spread wide to each side in V-shape
Tuck	Legs bend to the chest
Pencil	Legs together, body and legs make one line, no bend on the hips
Flag	Body in horizontal level, side towards floor.
Plank	Body on horizontal level, back towards floor or ceiling.

Grips and knots

Basic Grip

Arms span – thumb up without twist.

Twisted Grip

Arms span – twisted wrist, palm toward you

Shoulder rotation with grip

Knot

spiral wrapping with an additional upward lock up the fabric (wrist locks and foot locks)

Spiral wrapping

2 or more open ended wraps unless otherwise noted in the minimum requirements of an element

Loop knot

knot in the fabric with a loop

14. SILKS

14.1 GROUP A - FLEXIBILITY ELEMENTS

Note: All flexibility elements must be held in fixed position for 2 seconds.

Note: In masters +50 category a tolerance of 20° is given for the requirement to open the legs to 180° if there is no 160° variation for the move. Moves, that do have different levels of execution are without tolerance.

14.5 GROUP E - SPINNING ELEMENTS

Athlete can choose any element from groups A (flexibility elements), B (Strength elements) and group C (balance elements) and declare it as spinning element by changing the code from A001 to A001/E or B001 to B001/E.

Element must fill the original requirements described on the elements table and spin minimum 720° on fixed position

Note: Elements in D group cannot be used as spinning elements.

15. HOOP

15.1 GROUP A - FLEXIBILITY ELEMENTS

Note: All flexibility elements must be held in fixed position for 2 seconds.

Note: In masters +50 category a tolerance of 20° is given for the requirement to open the legs to 180° if there is no 160° variation for the move. Moves, that do have different levels of execution are without tolerance.

Value	Element	Code	Requirements
0.1		HA001	<p>Middle split hang 160°</p> <ul style="list-style-type: none"> • Opening of legs 160° or more • Legs are fully extended in middle split • Arms not in contact with hoop <p><i>Levels of execution:</i> HA001 Middle split hang 160° HA002 Middle split hang 180°</p>

15.5 GROUP E - SPINNING ELEMENTS

Athlete can choose any element from groups A (flexibility elements), B (Strength elements) and group C (balance elements) and declare it as spinning element by changing the code from A001 to A001/E or B001 to B001/E.

Element must fill the original requirements described on the elements table and spin minimum 720° on fixed position

Note: Elements in D group cannot be used as spinning elements.

16 HAMMOCK

16.1 GROUP A – FLEXIBILITY ELEMENTS

Note: All flexibility elements must be held in fixed position for 2 seconds

Note: In masters +50 category a tolerance of 20° is given for the requirement to open the legs to 180° if there is no 160° variation for the move. Moves, that do have different levels of execution are without tolerance.

Value	Element	Code	Requirements
0,1		AHA001	Upright backbend <ul style="list-style-type: none"> • Arms are fully extended • Only one foot in knot and hands in contact with the hammock

16.3 GROUP C: BALANCED ELEMENTS

Note: All balance elements must be held in fixed position for 3 seconds.

Note: In masters +50 category a tolerance of 20° is given for the requirement to open the legs to 180° if there is no 160° variation for the move.

Moves, that do have different levels of execution are without tolerance.

Value	Element	Code	Requirements
